

December 8, 2004

**KST UHF operation memorandum for the December 8, 2004 experiment**

*(Using Netscape might be in trouble on this page.)*

Experiment name: tau2pl (CP2)

This SP (CP2) is made to support a rocket launch from Andoya. All associations have contribute their SP times.

elan files:tau2pl-elan (just use tau2pl series)

Pulse scheme: tau2pl

**Start time: 19:06 UT on December 8, 2004**

**End time: 20:54 UT on December 8, 2004**

Participants: Satonori Nozawa, and Takuo Tsuda

Before our experiment: CP-3

After our experiment: CP-3

-----  
Note: (time in UT)

December 8

Cloudy. Temperature is 2 deg.

CP-3 had been operated.

18:54 STOP CP3

19:06 START

at EROS4 console (UHF)

**runexp /kst/exp/tau2pl/tau2pl 19:06 cp2 NI**

(292.9 km is set automatically for tristatic measurements)

rtg

Tx is on (1452 kW)

**19:06 enablerec**
